

14 credits

LING 5800 Methods & Materials in TEFL (4 cr.)

Second language teaching theory and methodology, with emphasis on teaching English as foreign language and language materials and course design.

LING 5510 Technology Enhanced Language Teaching I (4 cr.)

This course explores key terms and concepts related to computer-assisted language learning, a range of technology-assisted language learning tools, and practical considerations of how to use technology for teaching regarding various language skills.

LING 5520 Technology Enhanced Language Teaching II (4 cr.)

TELT II is a project-based course that emphasizes instructional design and user experience approaches to the development of online/hybrid courses and educational products/platforms that focus on student/user engagement, creativity, digital citizenship and digital age learning experiences from linguistics/applied linguistics perspectives.

LING 5921 TELT Teaching Practicum (2 cr.)

This course provides students with supervised opportunities to develop teaching materials and to assist with online instruction for teacher training for international faculty. Students apply practices related to language teaching methods, materials design, and computer assisted language learning. They are also responsible for creating instructional materials and environments used in the practicum. Students have opportunities to focus on a variety of teaching methods and English language skills, including writing for academic purposes, English as a medium of instruction (EMI), pronunciation, and other foci as appropriate.
